

Center Street Sidewalk Project 2012 (Petition)

We (Business Owners), the undersigned believe Center St. deserves more than just the "standard" Fayetteville sidewalk. As the unofficial entrance to the historical downtown area it should represent all the deep history, community and commerce the downtown area has become known for.

At the same time the new design should energize the downtown area with new life and vibrancy just as he city has done on Block St. Wider more pedestrian friendly sidewalks have been proven to increase consumer foot traffic flow. Patio seating for the restaurant & bars should be considered, this would bring a unique appeal to the area. Benches & bike racks for pedestrian use and comfort would give the street a real community feel that would encourage people to "hangout" in the area longer. Garden boxes as well as trees will give the street a "park" atmosphere making the area feel more safe and family friendly.

These are just a few ideas we think the City of Fayetteville should consider before placing the "standard" sidewalks on Center St. These ideas could set Center St. apart from the rest of the area as the entrance to the Historical downtown and at the same time solidify the whole historical downtown area as the very heart of community and commerce in Fayetteville.
