1st Term

4. Native or Invasive Plant Presentation- Will Dockery

- February -Preston
- March-Eric

5. Monthly numbers.

In December, all of the single-family residential HHOD projects were added to the yearly numbers. There were 20 HHOD single-family projects for 2020. 11 grading permits were approved. Twenty-three acres and 21.5 acres were existing canopies, and 18.5 acres were preserved for 86% preservation. These numbers are good because of one project, 18 acres. Without the large project, the numbers were 55% tree preservation on 5 acres of total development. HHOD projects were required to plant 62 trees as landscape requirements.

Of the 30.42 Acres of development, 23.7 was tree canopy, and 19.6 acres were preserved. Ninety-six trees will be planted as part of the landscape requirements for the projects.

Year to date, Urban Forestry has reviewed 377 acres of development, and 109 acres were canopy covered. 51% of 109 acres of tree canopy has been preserved. Four thousand Seven hundred and eighty-one trees will be planted as part of the landscape requirements.

6. Other Business

A. Amazing Tree of 2020- The Plaque is in, and they have the stone and will set it soon.

- B. Next Years Amazing Tree.
- C. Tree escrow project completed, 160 new trees along Cato Springs Trail from Greathouse Park to Kessler Mountain Regional Park.
- D. Code Changes from Environmental Action Committee
- E. U of A, Presentations to our Board?

7. **Adjourn**
