

MEETING OF OCTOBER 3, 2023

TO: Mayor Jordan and City Council
THRU: Susan Norton, Chief of Staff
FROM: Tim Nyander, Utilities Director
DATE:
SUBJECT: Jack Tyler Engineering, Inc. – Extension of Rental Pump for the Gregg Avenue Sewer Lift Station (LS5)

RECOMMENDATION:

Staff recommends approval of a pump rental in the total amount of \$41,675.00 plus applicable taxes from Jack Tyler Engineering, Inc. for the Gregg Avenue sewer lift station.

BACKGROUND:

The Gregg Ave. sewer lift station has four pumps total, and recently had two pump failures. The pumps were sent in for repair, and due to the lead time on parts the City had to have a working pump in its place. Jack Tyler Engineering provided a rental pump at the rate of \$7,255 per month. The purchase order was approved in the amount of \$27,165.00 plus tax and the pump was installed. This included 3 months of rental, and the inbound/outbound freight for the pump.

DISCUSSION:

A two-month extension of the pump rental is needed which will put the total cost over \$35,000, requiring City Council approval. The estimated cost of the two-month extension is \$14,510.00 plus tax, for a total estimated cost of \$41,675.00 plus tax.

Staff recommends approval of the pump rental extension with Jack Tyler Engineering.

BUDGET/STAFF IMPACT:

Funds are available in the Upgrade/Replace Lift Stations account within the Water & Sewer fund.
